

CAHPS Hospice Survey Telephone Script (English)

Overview

This telephone interview script is provided to assist interviewers while attempting to reach the caregiver of the sampled decedent. The script explains the purpose of the survey and confirms necessary information about the caregiver and decedent.

General Interviewing Conventions and Instructions

- The telephone introduction script must be read verbatim
- All text that appears in lowercase letters must be read out loud
- Text in UPPERCASE letters must not be read out loud
 - YES and NO response options are only to be read if necessary

*Note: It is not permissible to **capitalize** underlined content, as text that appears in uppercase letters throughout the CATI script must not be read out loud. Survey vendors are permitted to emphasize underlined content in a different manner if underlining is not a viable option, such as placing quotes (“”) or asterisks (**) around the text to be emphasized or italicizing the emphasized words.*

- All questions and all answer categories must be read exactly as they are worded
 - During the course of the survey, use of neutral acknowledgment words such as the following is permitted:
 - Thank you
 - Alright
 - Okay
 - I understand, or I see
 - Yes, Ma’am
 - Yes, Sir
- The script must be read from the interviewer screens (reciting the survey from memory can lead to unnecessary errors and missed updates to the scripts)
- The pace of the CAHPS Hospice Survey interview should be adjusted to be conducive to the needs of the respondent
- No changes are permitted to the order of the question and answer categories for the “Core,” “About Your Family Member” and “About You” CAHPS Hospice Survey questions
 - The first forty “Core” questions must remain together
 - The three “About Your Family Member” questions must remain together
 - The four “About You” questions must remain together
- All transitional statements must be read
- Text that is underlined must be emphasized
- Characters in < > must not be read
- [Square brackets] are used to show programming instructions that must not actually appear on electronic telephone interviewing system screens
- **Only one language (i.e., English or Spanish) can appear on the electronic interviewing system screen**

- MISSING/DON'T KNOW (DK) is a valid response option for each item in the electronic telephone interviewing system scripts. This allows the telephone interviewer to go to the next question if a caregiver is unable to provide a response for a given question (or refuses to provide a response). In the survey file layouts, a value of "MISSING/DK" is coded as "M – Missing/Don't Know."
- Skip patterns should be programmed into the electronic telephone interviewing system
 - Appropriately skipped questions should be coded as "88 – Not Applicable." For example, if a caregiver answers "No" to Question 4 of the CAHPS Hospice Survey, the program should skip Question 5, and go to Question 6. Question 5 must then be coded as "88 – Not Applicable." Coding may be done automatically by the telephone interviewing system or later during data preparation.
 - When a response to a screener question is not obtained, the screener question and any questions in the skip pattern should be coded as "M – Missing/Don't Know." For example, if the caregiver does not provide an answer to Question 4 of the CAHPS Hospice Survey and the interviewer selects "MISSING/DK" to Question 4, then the telephone interviewing system should be programmed to skip Question 5, and go to Question 6. Question 5 must then be coded as "M – Missing/Don't Know." Coding may be done automatically by the telephone interviewing system or later during data preparation.
